

Mario Gil. Software Engineer

Mario Alejandro Gil Lázaro

Mexico City, Mexico mariogillazaro@gmail.com <https://linkedin.com/in/xr4m>

Programming Languages

Typescript (proficient), Javascript (proficient), PHP (intermediate), Python (intermediate)

Software

React, Vue, Mithril, Jest, React Testing Library, Node.js, Express, Koa, Flutter, MySQL, PostgreSQL, MongoDB, Docker, Grafana, Sentry, Fullstory, Github Actions, Jenkins

Practices

TDD, CI/CD, Agile, Technical Mentoring, System Design, AI-assisted development, Design Systems, Clean Code, Open Communication, Version Control

Projects

Tempo App

<https://tempo.tzohpilotl.com>

A time tracking app to keep a record of time spent in tasks and projects.

Experience

Software Engineer @ Etsy

Mexico City, Mexico – 2022 - 2025

- Raised unit testing coverage by roughly 50% in my team's new frontend code
- Owned the team's mobile branch end-to-end – aligning design, mobile engineering, and QA – shipping Flutter features on schedule and within quality thresholds
- Built and maintained PHP API endpoints with roughly 0% performance degradation and bug count increase

- Acted as main frontend pull request reviewer
- Reduced team-wide production bug count by and estimated 10% by establishing testing strategies and thorough code reviews
- Imparted a testing strategies tech talk to the team
- Executed a large-scale data migration using Spark and Airflow

Software Engineer @ Scalable Press

Guadalajara, Mexico – 2020 - 2022

- Reduced total blocking time on a critical customer-facing page by 92% through targeted performance profiling
- Reduced time-to-interactive on the same page by 72% via code splitting and architecture improvements
- Established good practices for the frontend team as a result of the old codebase modernization
- Designed and implemented the first unit testing suite for our application

Software Engineer @ Wizeline

Guadalajara, Mexico – 2019 - 2020

- Delivered close to 100% of features on time for a US fintech React application
- Collaborated with a team spanning 3 time zones, maintaining reliable delivery cadence
- Taught higher-order functions and browser Javascript chapters in a Javascript training course

Software Engineer @ Wizeline

Ho Chi Minh City, Vietnam – 2018 - 2019

- Implemented a payment and loan React application for a Thai fintech
- Reduced the application's runtime errors in the Redux stores and connect adapters to 0%
- Presented the Redux chapter in a React training course
- Mentored the team on React hooks by presenting a technical talk
- Served as a main point of contact for the frontend team within a multicultural, 6+ nationalities team

Software Engineer Trainee @ Wizeline

Guadalajara, Mexico – 2017 - 2018

- Maintained and developed the company's website with almost 0% downtime
- Graduated successfully from the trainee program

Software Engineer @ Freelance

Salamanca, Mexico – 2017

- Delivered first professional project on time
- Learned Mithril (frontend), Mongoose (query builder) and Node fundamentals on the fly
- Onboarded teammates on deployment strategy and stack

Education

B. Eng. Computer Systems – 2017 Universidad de Guanajuato
